

450W ECOzero

DOMESTIC STAINLESS STEEL SUBMERSIBLE PUMP

FEATURES

The ECO Zero is a specially designed, stainless steel, submersible pump for both domestic clean and grey water applications and used for the transfer of treated effluent, domestic drainage or clean water. A double mechanical seal running in an oil bath chamber with a lip seal provides primary protection ensuring a reliable, trouble free operation.

- Float switch for automatic liquid level operation.
- Double mechanical seal, running in oil bath chamber, with a lip seal for primary protection.
- Complete stainless steel AISI 304 pump body.
- Built in thermal overload.
